

Environmental Policy

Statement of Intent

H & Askham Ltd.

We acknowledge our responsibilities under Environmental and associated legislation and will ensure that we, our employees, and others under our control use best available techniques and principles of precaution and prevention to carry out those responsibilities. We aim to minimise the environmental impact on all activities as identified in our initial environmental review. In particular Pedigree Group Limited aims to reduce waste, minimise our emissions to air, reduce water use and effluent to water by applying the best available technology and by applying the principals of pollution prevention.

We will achieve this by: -

- the use of low-waste technology
- the use of less hazardous substances
- recovering and recycling of substances generated and used in our processes and of waste, where appropriate.
- appropriate use of advanced technologies where possible.
- monitoring the nature and consumption of raw materials used in our activities and their energy efficiency.
- taking action to totally prevent or minimise the impact of emissions on the environment.
- preventing, where possible, accidents and spillage and minimise the consequence for the environment.
- ensuring that all employees are trained and equipped to support our policy.
